Description:

Bones is reversible, it is to say can be planted with the wide part or to use that part as base whenever the greater stability to be needed or by esthetics. By the level of engineering Bones is fantastic, an invisible internal structure provides the necessary strength transmitting the weight from the base of the container to the base of the flowerpot for achieve to support the weight of any plant or tree. Bones by Vondom is manufactured in resin of PE by means of the rotational molding technique and is available with multiples finishes and sizes.
