### **Description:**

With its slim 14 mm tabletop, Mesa is an understated line drawn through the room. The linoleum or laminate tabletop stands in sharp contrast to the soft curves of the aluminium frame and legs. In Mesa, Welling/Ludvik have designed a table that is stripped of decoration and superfluous detail. Thanks to the simplicity of the design, this table blends seamlessly into any décor – no matter whether it is destined for use as a dining table, desk or conference table. This table by Fredericia has been constructed using eco-friendly, environmentally recyclable safe materials and is easy to disassemble and destruct.
